

CHECKPOINTS

Checkpoint
1 of 10
Completing
the
square

Checkpoint
2 of 10
Finding
the vertex

Checkpoint
3 of 10
AS depth:
the $a \neq 1$
trap

Checkpoint
4 of 10
The
discriminant

Checkpoint
5 of 10
Applying
the
discriminant

Checkpoint 6
of 10
Sketching
from vertex
form

Checkpoint 7
of 10
Quadratic
inequalities

Checkpoint 8
of 10
Disguised
quadratics

Checkpoint 9
of 10
Line meets
curve

Checkpoint 10
of 10
Bringing it
together

Hi there — let's work through this one together.

CHECKPOINT 1 OF 10

Completing the square

Rewriting ax^2+bx+c in completed-square form

Completing the square: $2x^2 + 8x + 3$

Step 1 — factor out the coefficient of x^2
